INTRODUCTION

The WILP on Project Appraisal and Risk Analysis at CIMP is designed to equip participants with practical skills in project appraisal and risk analysis. Currently public domain officials are endowed with wider array of projects from multiple funding agencies in various domains in tandem with the explicit pattern in private sector. It is highly challenging to understand and address the problems of Government projects, execute them phase wise, and give them a final touch with multiple conflict from various stakeholders. It is often expected that public domain officers should sensitize with social cost and appraise it through proper risk analysis and take a rational decision. This WILP will tend to cover the various aspects of project appraisal and risk analysis in holistic decision making process. This WILP will cover the following aspects in detail.

1

What is policy framework in project executive?

Can we participate in project work?

3

How do we decide the financial and operational feasibility of the project?

What are the different stages of documentation with Government and banks' consortium?

2

4

5

Whether the risks are easily identified and appraised?

Is it socially and economically feasible?

7

What are the social, environmental and economic ramifications of the project?

Can we exit out of the project?
